

Please do not void the Indiana Do Not Call List law. I should have the right not to be bothered by solitication calls on a phone for which I pay the entire cost. Businesses have no right to use my telephone without my permission. Just as I or any other ordinary citizen has no right to use property owned by a business without the business's permission, similarly no business has a right to use my property (telephone service) without my permission. Please uphold this private property principle.
